DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5, 10-12 and 18-22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Marques et al. or Derleth et al.
3. Claim 6 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Marques et al.
4. Claim 9 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Derleth et al.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Derleth et al. in view of Danieau. Derleth et al. discloses the claimed invention except for air ducting in the dash. Danieau teaches that it is known to provide an HVAC apparatus with

Art Unit: 3749

air ducting in the dash as set forth at column 5, lines 32-39. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide air ducting in the dash of Derleth et al., as taught by Danieau in order to provide vent at remote locations.

7. Claims 8, 13-15 and 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Derleth et al. in view of Wilson et al. Derleth et al. discloses the claimed invention except for the inlet vents being on opposite side of the modular ventilation system. Wilson et al. teaches that it is known to provide inlet vents on opposite sides of an air conditioner case assembly as set forth at column 2, lines 47-50. It would have been obvious to one having ordinary skill in the art at the time the invention was made to locate the inlet vents of Derleth et al. to opposite sides of the housing, as taught by Wilson et al. in order to uniformly remove air from the vehicle interior.

8. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marques et al. in view of Masuda. Marques et al. discloses the claimed invention except for gasket disposed between the fresh air intake and the seat mount. Masuda teaches that it is known to provide a gasket between the intake and the seat mount as set forth at column 2, lines 27-52. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the system of Marques et al. with a gasket between the fresh air intake and the seat mount, as taught by Masuda in order to prevent air leakage.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 3749

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Allowable Subject Matter

10. Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

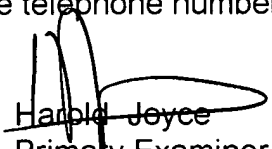

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
